☒ **Lookup Relationship**

Lookup Relationship

record

A read-only field that derives its value from a formula expression you define. The formula field changes only when any of the source fields change.

A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.
