

## New Flow

Core All + Templates

## Screen Flow

Guides users through a business process that's launched from Lightning pages, communities, quick actions, and more.

## Record-Triggered Flow

Launches when a record is created or updated. This autolaunched flow runs in the background.

## Schedule-Triggered Flow

Launches at a specified time and frequency for each record in a batch. This autolaunched flow runs in the background.

## Platform Event-Triggered Flow

Launches when a platform event message is received. This autolaunched flow runs in the background.

## Autolaunched Flow (No Trigger)

Launches when invoked by Apex, processes, REST API, and more. This autolaunched flow runs in the background.
